in [omri-bornstein](#)
🐙 [AppleGamer22](#)

Education

2017 **South Australian Certificate of Education**, [Australian Science & Mathematics School](#) (ASMS),
2019 Adelaide
2020 **Bachelor of Computer Science**, [Monash University](#), Melbourne
Present

Skills

- **Computer Programming Languages:** [Go](#), [TypeScript](#)/JavaScript, [Python](#), [Kotlin](#)/Java, C/C++
- **Document Markup Languages:** HTML/CSS, \LaTeX , Markdown
- **Databases:** [MongoDB](#)
- **Tools:** [Git](#), [GitHub](#)/[GitLab](#), [Docker](#), [Kubernetes](#), CI/CD
- **Platforms:** Linux, Cloud Native, web servers/browsers, macOS, Windows
- **Soft Skills:** technical writing, presenting/public speaking, research, troubleshooting/debugging, explaining, collaboration/teamwork

Leadership Experience

May 2021 **General Representative**, [Monash University's Cyber Security Club](#) (MonSec), Melbourne
January 2022
January 2022 **Secretary**, [Monash University's Cyber Security Club](#) (MonSec), Melbourne
June 2022
June 2022 **Vice President**, [Monash University's Cyber Security Club](#) (MonSec), Melbourne
Present

Projects

Open-Source

January 2022 **cocainate**, <https://github.com/AppleGamer22/cocainate>
Present

- A cross-platform re-implementation of the macOS utility [caffeinate](#) that keeps the screen turned on either until stopped, for a set duration of time or while another process still runs.

May 2022 **stalk**, <https://github.com/AppleGamer22/stalk>
Present

- A cross-platform file-watcher that can run a command after each file-system operation on a given files or simply wait once until a file is changed.

raker, <https://github.com/AppleGamer22/raker>

- A social media scraper that is interfaced via a server-side rendered HTML user interface (or a CLI), and is managed by a REST API and a NoSQL database.

December 2021 **CTFtime Discord Bot**, <https://github.com/monsec/ctftime-discord-bot>

- A discord bot I made for the [MonSec](#) Discord server, that fetches statistics about competing teams from [CTFtime](#), and displays them in the Discord interface.

June 2020 **sp**, <https://github.com/AppleGamer22/sp>
January 2021

- My first attempt at building a Minecraft server plugin. This plugin adds the requirement that the player supplies the password (via a server command) before proper server interaction is allowed, and as long as the password isn't provided, the currently-unauthorized player is blinded and immobile.

Research

August 2021 **Software Contributor**, [Monash University's FIT2082 unit](#), Melbourne
December 2021

- I [contributed](#) to an [existing codebase](#), based on prior research by ([Gange](#), [Harabor](#) and [Stuckey](#), 2021) about *Lazy CBS*, their [Multi-Agent Path Finding](#) (MAPF) algorithm.
 - I modified the *Lazy CBS* codebase such that the algorithm also outputs the final set of constraints that is used to rule out paths, such that *Lazy CBS* is formally an **Explainable** Multi-Agent Path Finding (XMAPF) algorithm.
 - I learned how to enable [Python-to-C++ bindings](#), such that the compiled *Lazy CBS* codebase can be used as a Python-facing library for future projects.

Freelancing

June 2021

December 2021 • I implemented a fault-tolerant file back-up system that enables the continuation of file transferring from an variably-approximate point in time before the back-up disruption.
